

# Inman Aligner™ Hands-on Certification Course

Presenter: Stephen M. Miller, DMD, MAGD

## Inman Aligner™: The Safe and Effective Solution for Anterior Crowding

The Inman Aligner™ is the most efficient removable appliance available to correct anterior crowding. The Inman Aligner is a revolutionary appliance that can be used as a stand alone treatment or combined with bleaching and bonding for a complete smile makeover. It is an ethical, minimally invasive approach that creates great results in as little as 6 to 16 weeks. Quick, efficient and affordable, the perfect choice for adult patients wanting a better smile. Become a Certified Inman Aligner Provider to offer more choices for your patients and a better bottom line for your practice.

### 3-Step Process

The treatment process is an easy three-step process that includes:

- 1** Impressions that are used to create a custom-fitting appliance. The Inman Aligner™ is made on very accurate 3D printed models. The models are digitally corrected into the ideal set-up based on aesthetics and occlusion.
- 2** The patient is fitted with the Inman Aligner™ and then returns to the practice for a follow-up appointment every two weeks until treatment concludes. The patient should be instructed to wear the Aligner for 16 to 20 hours a day for the fastest results. Although the appliance can be worn for less time, it will result in a longer treatment time. If, at any point during the treatment phase, should questions arise, dentists can quickly access web support.
- 3** The patient receives a bonded lingual wire or an Essix retainer for retention to prevent relapse.

### How it Works

Inman Aligner™ is a patented orthodontic appliance that creates gentle, steady pressure to help shift anterior teeth into the correct anatomical position. The benefits of the Inman Aligner™ are numerous, including:

- Safe – No harmful side effects.
- Convenient – Can be removed with ease and as needed by patients.
- Effective – Less invasive than some forms of cosmetic and reparative dentistry.
- Fast – Provides results in as little as 6 to 16 weeks.
- Affordable – Cost-efficient when compared to the expense of crowns and veneers for most patients.

### About the Speaker: Stephen M. Miller, DMD, MAGD

Dr. Stephen M. Miller, founder of the Miller Center for Comprehensive Dentistry, has been in private practice for over 35 years and is among the few dentists in the Pittsburgh area that have undertaken and earned the Academy of General Dentistry (AGD) Fellowship and Mastership awards (MAGD)—designations reserved for those dentists whom exhibit a profound commitment to continuing education, outstanding technical proficiency, and superior patient outcomes. Dr. Miller has also received Lifelong Learning & Service Recognition reserved for AGD Masters. His practice includes general, cosmetic, and restorative dentistry services. Recognized by Pittsburgh Magazine as a "Top Dentist," Dr. Miller is also devoted to his wife, Erica Miller, his confidant for 30 years, and a doting father to his two sons, Harley and Matthew.
